

We are looking for the following to strengthen our team  
**Engineer or architect as project team member**

**Our requirement profile:**

- You have a successful, completed (construction) technical degree, e.g. in architecture, civil engineering, industrial engineering or equivalent as a career changer,
- You already have experience in the work phases 6 to 8,
- You are interested in (construction) processes and structure,
- You have the will for digitalization and the use of software,
- You have a high degree of self-reflection, ambition and creative drive,
- You have the ambition for long-term development.

**Your tasks:**

You control the service phases six to seven and partly five to eight; this includes:

- The preparation and continuation of schedules,

In addition, you will manage the awarding process by

- the preparation of award schedules
- the preparation/checking of quantity surveys,
- the optimization and preparation of the line drawings,
- the coordination of the interfaces to the performance specifications of the technical parties involved in the planning process,
- the evaluation/verification of offers as well as the preparation of price comparison lists,
- preparing all contract documents for all service areas and assisting in the awarding of contracts.

Your new area of responsibility is therefore broad and you have a high development potential and can make a difference in the individual areas. Your achievements will be seen and recognised through the necessary, result-oriented project process.

**This is what we offer you:**

- Familiarization with the above topics and California AVA software,
- Payment of childcare fees,
- Meals incl. lunch,
- Pool car (e-vehicle),
- company e-bike,
- company cell phone,
- remuneration in excess of the collective wage agreement,
- further training measures,
- quarterly bonuses,
- relocation assistance.

**Place of employment:**

Cologne/Frechen-Königsdorf

**We look forward to receiving your application.**
